Tiki 17.0 released

Author: Gary Cunningham-Lee - Published Fri 28 Jul 2017 17:00 GMT-0000

The Tiki Community is pleased to announce the latest stable release - Tiki 17.0 aka Zeta Boötes. This update includes many new features and code improvements, as well as security fixes. Get Tiki 17.0 at the download page.

Tiki 17, originally scheduled for an April 2017 release but pushed back for extra fixes and enhancements, brings a number of significant new features including support for modern favicons, password blacklists, and a new method for annotations.

New external libraries integrated as features include H5P, the open source platform for creating, sharing, and reusing interactive HTML5 content; and CasperJS, a browser navigation scripting and testing utility written in JavaScript for PhantomJS or SlimerJS. (Correction: A previous version of this article stated that Exposé IDS (intrusion detection system) is a new feature in Tiki 17. This feature will debut in Tiki 18. Sorry about any confusion.)

Feature advancements include a massive improvement in PDF generation via mPDF, tracker additions and enhancements including a more versatile user selector field type, typography enhancements based on PHP SmartyPants, and a number of new wiki plugins.

For the most polished and feature-complete Tiki Wiki CMS Groupware experience, an upgrade to Tiki 17.0 or new installation as a first Tiki website is highly recommended!

Security updates: Tiki 16.2, 15.4 and Tiki 12.11 released!

Author: admin - Published Mon 30 Jan 2017 15:00 GMT-0000

The Tiki Community has released updates to all supported branches of the Tiki Wiki CMS Groupware project. These updates address an arbitrary file read vulnerability (already fixed in 16.1 but it was backported to 15.4 and 12.11 now) and a number of several other XSS and DoS related security vulnerabilities.

Special thanks to Zhao Liang from Huawei Weiran Labs, Cedric Van Bockhaven from Deloitte and 0xExploit for the cooperation and assistance in reporting the security issues.
We highly encourage all Tiki administrators to upgrade their sites to the latest Tiki versions: Tiki 16.2, Tiki 15.4 LTS, and Tiki 12.11 LTS.

Visit https://tiki.org/Download to get the latest version.

Security update: Tiki 16.1, Tiki 15.3 and Tiki 12.10 released!

Author: Security Team - Published Thu 22 Dec 2016 12:45 GMT-0000

The Tiki Community has released updates to all current versions of Tiki Wiki CMS Groupware. These updates address a cross-site scripting vulnerability in Tiki (CVE-2016-9889). The updates also include many other fixes and improvements.

Special thanks to 0xExploit for the cooperation and assistance in reporting the security issue.

We highly encourage all Tiki administrators to upgrade their sites to the latest Tiki versions: Tiki 16.1, Tiki 15.3 LTS, and Tiki 12.10 LTS.

Visit https://tiki.org/Download to get the latest version.

Tiki Nominated for 2016 CMS Critic People's Choice Award!

Author: Rick Sapir / Tiki for Smarties - Published Tue 20 Sep 2016 17:01 GMT-0000

The Tiki Community is proud to announce that Tiki Wiki CMS Groupware has been nominated for a CMS Critic award in the Best Intranet Software category.

You can show your support by taking a moment to vote for Tiki! Voting is open until November 1, 2016. Winners will be announced November 10, 2016.

To vote, visit https://www.cmscritic.com/awards/.
Two Upcoming TikiFest Events

Author: ricks99 - Published Fri 05 Aug 2016 12:33 GMT-0000

The Tiki Community is planning two TikiFest (code sprint) events in the next month:

- **TikiFest FrOSCon** will be held in Bonn, Germany from August 13-23 (during FrOSCon, Aug 20-21). Visit [https://tiki.org/TikiFestFrOSCon2016](https://tiki.org/TikiFestFrOSCon2016) for details.
- **TikiFest Hungary** will be held in Budapest, Hungary from August 23-29. Visit [https://tiki.org/TikiFestHu2016](https://tiki.org/TikiFestHu2016) for details.

All members of the Tiki Community, as well as anyone interested in wikis and content management systems (CMS) are invited to join us! Many of the most active contributors to Tiki will be present to plan, design, and code upcoming Tiki releases.

What is a TikiFest? It is a tradition in the Tiki community, a TikiFest is a meeting between Tiki community members (that usually only meet online). This is an opportunity to socialize, code and discuss about wiki technology and culture, etc. Learn more at [https://tiki.org/TikiFest](https://tiki.org/TikiFest).

Have you nominated Tiki for the 2016 CMS Critic Awards yet?

Author: ricks99 - Published Wed 27 Jul 2016 12:36 GMT-0000

Nominations for the [2016 CMS Critic Awards](https://tiki.org/TikiFest) remain open through **September 1, 2016**.

The CMS Critic awards were started three years ago in order to fill a gap that was missing in the business software industry. While there have been similar awards in the past that have been given out, none have been truly focused on ensuring fair exposure and opportunity to all players in the market. This is the reason the CMS Critic awards were created.

The products / companies with the most nominations (valid ones that is) will be shortlisted for the voting stage. As this first portion of the awards is the People's Choice portion, this all relies on you and your nominations (and votes once we get to that stage) so please support Tiki! Actual voting begins September 15.

The Tiki Community is proud to announce that Tiki Wiki CMS Groupware has been named by Small Business Computing as one of the best open source collaboration tools!

From their article:

"Collaboration software offer small businesses a wide variety of benefits. They can increase teamwork and communication, particularly if people on your team work in different locations. They can also help you share knowledge more widely throughout the organization and lessen the chance that employees will waste time duplicating the same work. They can also streamline your business processes and reduce the need for face-to-face meetings—both of which can decrease costs."

For Tiki specifically, the article goes on to say:

"Today, it's a more full-featured open source collaboration software tool that also includes blogs, forums, calendar, image galleries, and surveys. Many people use it to manage their websites, and it can be particularly useful for intranets focused on a particular project."
Security update: Tiki 15.2, Tiki 14.4 and Tiki 12.9 released!

Author: luciash d' being - Published Fri 08 Jul 2016 20:00 GMT-0000

The Tiki Community has released updates to all current versions of Tiki Wiki CMS Groupware. This update addresses a critical vulnerability found in third-party code that is included with Tiki. The update also includes many fixes and updates.

Special thanks to Mehmet Dursun İNCE of www.invictuseurope.com and to Robert Abela of www.netsparker.com for their cooperation and assistance in reporting the security issues.

We highly encourage all Tiki administrators to update their sites to the latest Tiki versions: Tiki 15.2, Tiki 14.4, and Tiki 12.9 LTS.

Visit https://tiki.org/Download to update the latest version.

Tiki Monthly Roundtable Meeting

Author: Bernard Sfez - Published Wed 15 Jun 2016 07:45 GMT-0000

This month (June) our monthly meeting, our Roundtable discussion, is on Thursday, 16 June 2016 at 13:00 utc.

Our Roundtable meetings are cordial and fun, and besides, you will learn and be at the heart of Tiki’s team action.

More information to come at: https://tiki.org/Roundtable+Meeting+2016+06

Tiki 15.1 and multiple version updates released, Tiki
The Tiki community is pleased to announce Tiki 15.1, the latest stable LTS Tiki version featuring numerous fixes.

To download the current stable Tiki, see https://tiki.org/Download

Version updates have been released for previous Tiki versions too, including Tiki 12.8 and Tiki 14.3. These versions include critical security fixes (*) so Tiki users are recommended to upgrade to the latest version as soon as possible.
