Community Worldmap

The Map is not currently functioning. Please stand by.

How to participate

- Access your User Preferences.
- Find your location on the map.
- Make sure to click (if you do a search, it shows the result of the search, but you still need to click).
- Click "Save Changes".

You will not appear on the map yet, because we are dealing with indexing issues .

Ideal user story

1. User registers at Tiki.org.
2. User adds his/her location to tiki.org information.
3. User sees other Tiki community members near him/her.
4. User clicks on username and can see the user contributions.
5. User can click to become a friend of this person.
6. They get in touch to decide to organize a TikiFest .

This will help the emergence of the Tiki Local User Group. The same idea will apply to special interest groups (which is a subset of the community) like GLUG user map. We could also make maps per city / region, and list all users.

Currently testing

Many are not working because we have indexing issue with legacy data

- Developers map (works)
- User map
- All users in Canada Just Map
- All users in France Just Map
- Map of all TikiFests
- GLUG user map
- Map of all users via searchlayer
- http://demo.tiki.org/maps/

Alias

- CommunityWorldmap
