Welkom bij Tikiwiki !

Tiki CMS/Groupware, ook bekend als Tikiwiki, is een krachtig web-gebaseerd Groupware en Content Management System (CMS), dat gebruik maakt van PHP, ADOdben smarty. Het kan worden gebruikt om allerlei vormen van Webapplicaties te maken, Sites, Portals, Intranets en Extranets. Er kan bijvoorbeeld ook een GeoCMS (Geospatial Content Management System) mee gemaakt worden. Het wordt ontwikkeld door een groot aantal deelnemers die de Tikiwiki Community vormen.

Deze website bevat een gedeelte van de aktiviteit van deze comunity.
Kijk ook eens bij de recente documentatie bijdrage op http://doc.tiki.org, bekijk de TikiMovies, en kijk rond in Help. Deze website is erg groot, een beetje 'open' en vrijblijvend in zijn samenwerkings verband, dus wees niet verbaasd over de diversiteit van de 1500 wiki pagina's die hier te vinden zijn.

Tips:
Op de ... dochter-site van tiki.org kunt u overigens ook in contact komen met de **nederlandstalige** Tiki gemeenschap. Iedereen is van harte welkom!

Tiki's beveiliging is belangrijk voor ons:: Lees TikiSecurity en help mee om Tiki nog beter te beveiligen.

WikiSuite is 13 years old!

Marc Laporte - 11 Mar 2024 18:45 GMT-0000

So I launched this 13 years ago! I am very pleased with the current state and progress. It will just get better and better as the community grows

Here were the initial vision/goals/plans:

A slideshow: https://wikisuite.org/Initial-Slideshow
An interview (in French): https://wikisuite.org/Initial-Interview

It was originally called "Tiki Suite" as a suite of tools around Tiki Wiki CMS Groupware, and also because suite also means next in French. So the next step for Tiki

Happy 21st Anniversary, Tiki!

John Santos - 08 Oct 2023 23:50 GMT-0000

> Today, we raise a virtual toast to celebrate the remarkable journey of Tiki Wiki CMS Groupware as it turns 21. What began as a modest wiki with extras in 2002 has blossomed into a versatile web application, shaping the landscape of intranets, websites, portals, knowledge bases, and more. Tiki has not just stood the test of time; it has evolved into a tech powerhouse.

Tiki 26 Release Continues Rapid Feature Development

Gary Cunningham-Lee - 30 Jul 2023 15:29 GMT-0000

Following the project's biggest-ever release, Tiki 25, seven months ago, the pace of code commits has only accelerated and now Tiki 26 is available with significant new features, further development of recent feature additions, and the usual bug fixes and enhancements.

New features include color mode support, so Tiki sites are responsive to the user's browser color scheme preference and can be toggled between light, dark, and auto (with more configurability options coming soon). A new emoji picker enables picking and inserting emojis (finally). Tiki 26 includes a new theme, BookStacked, an implementation of the BookStack web app appearance. Interact.js and a URL fragment guesser have also been added.

Enhancements have been made to Cypht webmail, Calendars, the debugger console, InterTiki (for inter-Tiki-website interaction), Manticore search, Tiki's Markdown implementation, several modules, Tablesorter, Tiki Crawl for web scraping and web crawling, and the tracker feature. See https://doc.tiki.org/Tiki26 for more details.

Tiki 26 has been updated to benefit from the higher performance and new features of PHP 8.1. See Requirements for more information about Tiki and PHP versions.

This release is available for download or installation via git or Tiki Manager.

Many thanks to all who contributed to developing and testing Tiki 26.

Tiki is free Open Source software that is made possible by individual volunteer efforts and donated funds and services. If you would like to help the project continue, please visit the page Contribute to Tiki. Any donation would be greatly appreciated.

If there are any questions about this new release, please ask in the Tiki community chat room or use other contact options. To look into paid assistance, please visit the consultants page. For enterprise-level support, please contact EvoluData.
