Welkom bij Tikiwiki !

Tiki CMS/Groupware, ook bekend als Tikiwiki, is een krachtig web-gebaseerd Groupware en Content Management System (CMS), dat gebruik maakt van [PHP](#), [ADODB](#) en [smarty](#). Het kan worden gebruikt om allerlei vormen van Webapplicaties te maken, Sites, Portals, Intranets en Extranets. Er kan bijvoorbeeld ook een GeoCMS (Geospatial Content Management System) mee gemaakt worden. Het wordt ontwikkeld door een groot aantal deelnemers die de Tikiwiki Community vormen.

Deze website bevat een gedeelte van de activiteit van deze community.

Kijk ook eens bij de recente documentatie bijdrage op <http://doc.tiki.org>, bekijk de TikiMovies, en kijk rond in Help. Deze website is erg groot, een beetje 'open' en vrijblijvend in zijn samenwerkingsverband, dus wees niet verbaasd over de diversiteit van de 1500 wiki pagina's die hier te vinden zijn.

Tips:

Op de ... dochter-site van tiki.org kunt u overigens ook in contact komen met de **nederlandstalige** Tiki gemeenschap. Iedereen is van harte welkom!

Tiki's beveiliging is belangrijk voor ons:: Lees TikiSecurity en help mee om Tiki nog beter te beveiligen.

We released Tiki 22.0 (but forgot to tell you about it)

Author: Communications Team - Published Mon 25 Jan 2021 12:00 GMT-0000

The Tiki Community is happy to announce that **Tiki 22.0**, a new major version (codenamed *Corona Borealis*), has been released!

We recommend all Tiki users **who are eager to get the latest cutting edge** Tiki version to install it fresh or upgrade their existing sites to **Tiki 22.0** and try it out. For the [LTS](#) we recommend you wait until Tiki 23.0 is released.

Happy Birthday, Tiki!

Author: habiba - Published Fri 09 Oct 2020 16:16 GMT-0000

October 9th is a special date for us, as it marks the completion of another successful year for Tiki Wiki CMS Groupware. It was all started in 2002 by Luis Argerich with just a handful of users and with significant community support still off in the future. After years of active development, in 2020, Tiki has had one of the largest Open Source teams in the world. Tiki has been contributed to by some 300 developers, and has thousands of users, many features and configuration options, continuous improvement and industry-wide use for public websites and nonpublic intranets and special applications.

Virtual TikiFest June the 13th 2020

Author: Bernard Sfez / Tiki Specialist - Published Mon 08 Jun 2020 06:51 GMT-0000

The Tiki Community will join together for a Virtual TikiFest June 2020.

As it has never been done before, for this virtual TikiFest we are trying a kind of new concept — with no traveling involved, there are no constraints regarding locations or timing.

Several tasks, discussions, topics are being organized:

- Profiles Revamp
- Vue.js
- Tiki sites Improvements
- Endangered features
- Web browser accessibility
