Happy Seventeen, Tiki !

Bernard Sfez / Tiki Specialist - 21 Oct 2019 15:37 GMT-0000

Congratulations to all of the Tiki family for completing 17 years of improvement, enhancement and continuous releases.

In October 2002 (on the 9th), the first piece of the Tiki open source software code was released, and today Tiki is one of the most advanced wiki-centric web applications available. Tiki 20 is the fruit of this hard work. This version is a big jump toward our next major release and everyone is warmly invited to upgrade to Tiki20 to enjoy many improvements. This achievement is the result of the continuous efforts of the Tiki contributors and community and it is a great celebration for all!
